PROFESSIONAL SUMMARY

Software Developer with 1+ year of professional experience building enterprise web applications across frontend, backend, APIs, and databases. Strongest in C#/.NET, Blazor, and SQL Server, with hands-on project experience in React, Next.js, Node.js, React Native, and Kotlin. Fixes defects, improves performance and reliability, and writes unit tests in Agile/Scrum teams. Quick to learn new languages, frameworks, and tools.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL, Java, Python, Kotlin, PHP

Frontend: Blazor, React, Next.js, HTML5, CSS3, Tailwind CSS, Syncfusion

Backend and APIs: ASP.NET Core, .NET 8, REST APIs, Entity Framework Core, Node.js, Express.js, Prisma, JWT Authentication

Databases and Cloud: SQL Server, MySQL, PostgreSQL, MongoDB, Firebase, Azure, Azure Web Apps

Mobile and Blockchain: React Native, Expo, Android, Solidity, Smart Contracts, Ethers.js

Testing and Tools: xUnit, Playwright, Git/GitHub, Azure DevOps, Visual Studio, VS Code, Postman, Figma, GitHub Copilot, Agile/Scrum

Integrations: Stripe, Webhooks, Google Maps API, Firebase Cloud Messaging

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Logicim Inc. | April 2025 – September 2026

- Delivered features and UI enhancements across the full stack with C#, .NET, Blazor, ASP.NET Core, Entity Framework Core, and SQL Server.
- Resolved UI, validation, workflow, and business-logic defects across frontend components, backend services, REST APIs, and database operations.
- Improved performance and reliability with optimized data retrieval, caching, and HTTP resilience; raised maintainability through code-quality fixes.
- Wrote xUnit tests for features and bug fixes; worked in Agile/Scrum with Azure DevOps, GitHub pull requests, and code reviews.
- Used GitHub Copilot and AI-assisted tools to speed up development.

Salesforce Administrator Intern | Accenture | January 2026 – May 2026

- Administered users, roles, profiles, and permissions and configured workflow automation to reduce manual tasks.
- Built reports and dashboards and supported data migration and cleanup, improving CRM visibility and data accuracy.

PROJECTS

Food Finder | Full-Stack Web Application | September 2026 | github.com/dianaangan/food-finder

- Built a multilingual product-discovery platform with Next.js, React, TypeScript, Tailwind CSS, Express.js, Prisma, and MySQL, using the Open Food Facts API.
- Implemented search with pagination, recent-search history, and subscription-based nutrition access with Stripe test subscriptions and webhook synchronization.

AgriTrust: Blockchain-Driven Agricultural Supply Chain | Capstone | December 2025 |

github.com/dianaangan/AgriTrust

- Developed role-based React Native and Node.js apps for farmers, customers, and drivers with order tracking, real-time notifications, an analytics dashboard, and GPS route-based delivery pricing.
- Integrated Stripe, Solidity smart contracts, Ethers.js, Firebase, MongoDB, and the Sepolia testnet for tamper-proof transaction records and automated fund distribution after delivery.

KnockTrack: IoT Smart Doorbell Monitoring System | Android App | September 2025 |

github.com/dianaangan/KnockTrack

- Designed and built a Kotlin Android app from wireframes to implementation with Firebase authentication, cloud-synced activity records, real-time push alerts, and a visitor-monitoring dashboard.

EDUCATION

Bachelor of Science in Information Technology | University of Cebu – Banilad Campus, Cebu City | June 2026

Dean's List, Years 1–2 | 3rd Place, ICT Congress 2024 Hackathon (April 2025)

CERTIFICATIONS

- Salesforce Administrator Internship Completion Certificate | Accenture | 2026
- ICT Congress 2026 UI/UX Participation | University of Cebu | April 2026
- Cisco: Networking Essentials and Introduction to Packet Tracer (May 2022); Introduction to Cybersecurity (March 2022)
- NC II, Computer System Servicing | TESDA | March 2020
