PROFESSIONAL SUMMARY

Software developer with professional experience delivering features and improving business web applications. Works across user interfaces, backend services, APIs, and databases; resolves UI and business-logic defects; improves performance and reliability; and writes unit tests. Hands-on project experience includes web, mobile, cloud, payment, mapping, and blockchain technologies.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Logicim Inc. | April 2025 - September 2026

- Delivered application features and UI enhancements using C#, .NET, Blazor, ASP.NET Core, Entity Framework Core, and SQL Server.
- Diagnosed and resolved UI, validation, workflow, and business-logic defects across frontend components, backend services, REST APIs, and database operations.
- Improved application performance, reliability, and maintainability through optimized data retrieval, caching, resilient service communication, and code-quality fixes.
- Created xUnit tests for features and bug fixes and collaborated through Azure DevOps, GitHub pull requests, Agile workflows, and code reviews.

Salesforce Administrator Intern | Accenture | January 2026 - May 2026

- Administered users, roles, profiles, and permissions; configured workflow automation to reduce manual tasks.
- Built reports and dashboards and supported data migration and cleanup to improve CRM visibility and data accuracy.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Java, Python, Kotlin, PHP, SQL, C, Solidity

Frontend and UI: React, Next.js, Blazor, HTML5, CSS3, Tailwind CSS, Shadcn UI, Vite, Syncfusion, Figma

Backend and APIs: .NET 8, ASP.NET Core, Node.js, Express.js, REST APIs, JWT authentication, Entity Framework Core, Prisma

Databases and cloud: SQL Server, MySQL, PostgreSQL, MongoDB, Firebase, Supabase, Azure Web Apps, Vercel, Upstash Redis

Mobile, desktop, blockchain: React Native, Expo, Android, JavaFX, Windows Forms, WPF, Hardhat, Ethers.js, smart contracts, Sepolia

APIs and services: Stripe, webhooks, Google Maps/Places, Firebase Cloud Messaging, Cloudinary, Open Food Facts, Alchemy

Engineering and tools: OOP, data structures and algorithms, MVC/MVP, MVC Architecture, database design, Database Design (ERD), xUnit, Playwright, debugging, unit testing, Git/GitHub, Azure DevOps, Postman, Visual Studio, VS Code, Android Studio, IntelliJ IDEA, Apache NetBeans, Cursor, GitHub Copilot, Codex, Agile/Scrum, Waterfall

PROJECTS

Food Finder | Full-Stack Web Application | September 2026

- Developed a multilingual product-discovery platform using Next.js, React, TypeScript, Tailwind CSS, Express.js, Prisma, and MySQL, with data from the Open Food Facts API.
- Implemented product search and pagination, recent-search history, subscription-based nutrition access, Stripe test subscriptions, and webhook synchronization.

AgriTrust | Capstone Project | December 2025

- Developed role-based React Native and Node.js applications for farmers, customers, and drivers with order tracking, real-time notifications, analytics, and GPS delivery workflows.
- Integrated Stripe payment processing with Solidity smart contracts, Ethers.js, and the Sepolia test network for secure payments, traceable transaction records, and automated fund distribution after delivery.

KnockTrack | Android Application | September 2025

- Designed and built a Kotlin Android smart-doorbell app with Firebase authentication, cloud-synchronized activity records, real-time alerts, and a visitor-monitoring dashboard.

EDUCATION

Bachelor of Science in Information Technology | University of Cebu - Banilad Campus | June 2026

Dean's List, Years 1-2

CERTIFICATIONS AND AWARDS

Salesforce Administrator Internship Completion Certificate | Accenture | 2026

ICT Congress 2026 UI/UX Participation | University of Cebu | April 2026

ICT Congress 2024 Hackathon - 3rd Place and Participation | University of Cebu | April 2025

Cisco: Networking Essentials and Introduction to Packet Tracer | May 2022; Introduction to Cybersecurity | March 2022

NC II, Computer System Servicing | TESDA | March 2020
